Dear Brigadier General Carl Strock,

I think that we should not tear down the dams because we need the energy. If we tear down the dams it would cost millions of dollars! We can save fish by not fishing for a little while. If we breach the dams a lot of people will lose their jobs. My teacher Mrs. Johnson taught us about this and I think that it's wrong to breach the dams.

Sincerely,

Michelle Hilmes

I am in Mrs. Johnson fourth grade class
