FEB 22 2008

Dear Brigadiar General Carl Strock

I think you shouldn't breach the dams because the electricity will go and the water will be like a river so you can't water ski and boat. You would have to shut down P.F.I and that's where we get our paper and a lot of other things we use.

Im in fourth grade and my teacher is Mrs. Johnson and she taught us about this and I think It's wrong to breach the dams. there even might be a chance of a flood. It cost a lot of money to make the dams and it's going to take a lot of money to breach the dams. You will put a lot of people out of business. Lewiston won't be a seaport anymore and that's where ships and boats come through to give us stuff and ship stuff out.

Sincerely,
Cassi Miller
