February 17, 2000

To: Corp of Engineers

The dams should be left in place to run the barges. It would be very bad to haul all the wheat by truck. The roads would be overloaded and dangerous. It would be very expensive to repair roads and build more roads.

According to the Spokesman Review we will have a power shortage within the next three years

We do not think it advisable to remove power we already have. Columbia County has a Marina on the Snake River which would be closed. There are many cruise boats bringing guests up the river. If the dams were removed it would not be possible to have as much recreation as we have presently.

Yours Truly

Nadine Warren Robert Warren
