To Whom It May Concern

Hello, my name is Danielle Bartlow. I am 10 years old and I live in Pomeroy, WA. I am against the breching of the dams because if the dams are breched many people will lose their jobs. Farmers, dam workers, and many other work at the dams. Farmers would have to drive their wheat or barly by truck and that would be really expensive and rather long, instead of by barge which is faster and less expensive. Dam workers would have to get a new job or move. I know some people that are farmers or dam workers and they are so devoted to their job that it would break their heart to have to move or get another job. I understand the concern about saving the salmon, but God put people above animals not animals over people. I thank-you for taking the time to read my letter.

Sincerely,
Danielle Bartlow
