Dear Sirs —

The salmon need our help! I say go for it!

a friend of mine looked forward to going out there salmon fishing + leaving his worries behind. Forget it! No fish! Came back with more worries instead.

My uncle worked out there helping put them ~~in~~ He's gone now. Thank goodness he didnt realize they were causing more trouble than helping!

If the years have proved the dams arent helping then why keep them?

Sincerely,
Betty Wayne Price
