APR 0 5 2000

For the Corps of Engineer -
We are all members of a small camping Club called Eagles Camper Club - If we destruct the things we we already built - then we are moving backwards Things would never be the same.
We think this problem should be brought to final vote - by the people Now where will this stop if we do remove the dams.
Other species that were dwindling were protected until recovered, why not the salmon?

Sincerely Eagle Camper Club -
