Corp of Engrs.

Do not breech the Lower Snake River dams! People are important! Consider their value to river water transportation, creeping up highways. Yard-working farmers whose lands need this irrigation, plus electricity, & safe flood control! Fruit, vegetable and abundant crops has benefitted this area & the world. We need to keep a stable agricultural economy continuing for our people to help feed the world!

Develop more Salmon farms below this river area. Do not undo the rich economy that the dams foster! Propagate more fish through hatcheries, giving healthy fish & more quality employment & research development!
