**Lower Monumental Lockage Delays**

Beginning September 14, locking through the Lower Monumental Lock & Dam, located at Snake River mile 41.6, may be delayed due to repairs to the navigation lock tainter valve. Mariners should call ahead to coordinate lockage times at least three hours prior to arrival in order to minimize delays. Coordination can be made through either Marine Channel 14 or by commercial telephone at (509) 282-7231.

The contractor will begin repairs on Monday. This includes installing new tainter valve lifting eyes, replacing various pins and bushings throughout the tainter valve operating assembly and repair concrete spalling. It is anticipated repairs will be completed in early October, but updates will be provided.

For further information on this matter, call Operations Division at (509) 527-7113 or (509) 527-7115.
