The Corps will consider special lockages, outside the above scheduled lockage times, for flotillas or other unique requirements sponsored by yacht clubs, marinas, and other groups, provided advance (at least 24-hours) arrangements have been made with the appropriate control room operator.

Contact the following control room operators via VHF-FM Channel 14 or commercial telephone for scheduling of special lockages:

McNary Chief Operator at 541-922-2231. Call Sign: WUJ41 McNary.  
Ice Harbor Chief Operator at (509)-543-3231. Call Sign WUJ42 Ice Harbor.  
Lower Monumental Operator at (509) 282-7231. Call Sign WUJ43 Lower Monumental.

When a recreational vessel lockage schedule is in effect, recreational vessels will only be allowed to lock through at the times designated for such lockages and they will take precedence over commercial vessels. Commercial vessels will continue to be locked through upon arrival except during the times specified for recreational vessel lockages. At the discretion of the lock operator, recreational vessels may be allowed to lock through with commercial craft.

Everyone in the vessel must be wearing a personal floatation device throughout the duration of the lockage. All vessel owner/operators lock through at their own risk and must follow the directions of the lock operator when using the locks or operating in the vicinity of the locks. The lock operator has final authority on the suitability of a craft for lockage. Please refer to U.S. Army Corps of Engineers Safe Lockage Policy for Recreational Craft on the Columbia and Snake Rivers, published separately, for additional safety requirements.

For additional information on this matter or copies of our Safe Lockage policy, please call Operations Division, at telephone (509) 527-7112.
