Channel Maintenance at Ice Harbor Successfully Completed

Post Survey Planned November 15, 2012

Channel maintenance was completed on November 12, 2012 at the downstream approach to Ice Harbor Lock & Dam, located at Snake River mile 9.7 and the lock has returned to full service.

A post survey of the downstream lock approach area is scheduled for November 15, 2012. During the daylight hours of the 15th, vessel Captains are to call the Ice Harbor control room, as early as contact can be made, to announce their estimated arrival time for lockage. The control room will advise the vessel of the survey crew's status and if there could be a short delay in lockage.

Your cooperation in this matter is much appreciated. For additional information, please call Operations Division, at (509) 527-7115 or (509) 527-7120.
