Lower Snake River Juvenile Salmon Migration Draft Feasibility Report/ Environmental Impact Statement

The U.S. Army Corps of Engineers invites any person who has an interest in the Draft FR/EIS or represents a group of people that have an interest in the subject matter of this study, to make comments. The Corps will respond to the comments related to their Draft FR/EIS in their next NEPA document produced for the Lower Snake River Juvenile Salmon Migration Feasibility Report/EIS. Comments will be accepted through March 31, 2000.

Name: HRL Cowy

Organization: Pothole

Comments: My opinion is, after listening to many comments is that everybody is prepared to let others suffer because of their own interests. I have worked at Pothole for 23 years and perhaps I too can qualify. I want to state my opposition to drawing down on breaching any of the dams in question. Me and my family have grown to love the Lewis-Clark Valley - the quality of life it has to offer and all the benefits that go with it. I truly believe that there are alternatives that have not been looked at because of the pressures that have been put on those involved in the decision making process. The energy lost would have to be supplied by someone that would not be as environmentally conscious as a dam.
