

FEB 22 2000

Dear Brigadier General Carl Strock,

I think we should not breach the dams because, I think we should take care of ourselves and worry of the fish later. Also because it's going to cost a lot for electricity if we breach the dams. Also because it takes a lot of money to make to make the dams and it will take a lot to breach them. Also Mrs. Johnson, my fourth grade teacher said "Research shows about 95% out of hundred fish get through the dams. My fourth grade class and I think a lot alike and we think you shouldn't breach the dams.

Sincerely,
Jennifer
