Comments on Snake River Dam Removal

Gentlemen:

I am totally against removing the Snake River Dams based on the facts as they are now being presented. Several points lead me to this conclusion:

1. The U.S. Government has not addressed the over fishing of our oceans by foreign countries within just a few miles of our shores. How can we consider Dam Removal to increase salmon counts while we are still over fishing?
2. The U.S. Government is still allowing Indian net fishing in the Columbia River. Until this is stopped we will continue to reduce salmon counts.
3. The Snake and Columbia River Barge System improves our environment dramatically by replacing hundreds of thousands of truck trips moving agricultural products to Portland and Vancouver.

Please use some common sense and do not remove the dams. Correct the obvious problems.

Sincerely,

Mike Hambelton
