Greetings:

Please add us to your list of people **opposing** the removal of the Lower Snake River Dams. We feel these dams are as important now as they were when they were built.

Besides offering navigable waterways, these dams contribute significantly to the area's efficient food production, a worldwide contemporary necessity.

Of primary importance is the electrical energy production at these dams. Of all the choices presently available to us for generating power, hydropower is the cleanest, greenest, cheapest, and most renewable.

We feel the loss of any dam to be a severe blow to our environment.

Sincerely,
