Dear NMFS and U.S. Army Corps:

We are a concerned environmental club here at Iowa-Grant High School, and we are greatly concerned about the threatened Snake Bas salmon. This extinction would be a great loss to the environment. We believe that it is time to reevaluate ^{NO permits name} the quantity harvest of this species which belongs ultimately to the same ecosystem that we all share. Recovery efforts of these salmon must begin immediately to secure the species. Dam removal must be undertaken to restore and protect the beautiful salmon. When we carelessly allow a species to die, it ultimately affects the human species as well. We are just becoming one step closer to extinction ourselves.

Please remove the four lower Snake dams to save the salmon as well as other aquatic life in the area. Please include our comments in the administrative record.

Sincerely,

TOM Eckhardt
