Re: NMFS All-H paper and the Corps DEIS

To whom it may concern:

I would like to comment on the NMFS All-H paper and the Corps DEIS. I support the removal of the Snake River dams as the best means to help the salmon stocks recover. All too often in the past we have sacrificed the natural processes in order to support an unsustainable life style. It is time to slow this process down and admit that the natural process of raising salmon is the best one around.

Please remove these dams which are not worth the cost of the lost salmon runs.

Sincerely,

David Lesh and Jo Ann Lesh
