Dept. of the Army
Corps of Engineers
Walla Walla Dist.

Dear Friends,

I write to urge The Corps to take action to bypass The four Lower Snake River dams to promote salmon recovery. The N.M.F.S. study indicates that without this action The salmon will become extinct. This would be a disaster! On the other hand a strong recovery would be a tremendous economic, environmental and spiritual blessing. As God's stewards of this earth we can do no less.
Please save the salmon!

Sincerely,

Rev Douglas Lindsay
