Subject: Publications

I am very interested in this study as I am working on a project for Environment Australia investigating environmental water (or instream flow) requirements to maintain estuarine processes for estuaries Australia-wide. At the download page ftp://ftp.nwd.usace.army.mil/anonymous/nww/study_kit/studypage.htm, I am bit confused about the missing Appendices (J, T and U). What does it mean by "This appendix will not be available for the draft review period. Once a preferred alternative is identified, this appendix will be finished"?

Regards,

Peter Horton
