

I employ 7-10 people. I work on Forest Service  
and private lands. We do ecosystem management  
and forest restoration. 25-30% of our logs  
are pulp wood small diameter. We sell this to  
Mt. Fir & Granger in Clarkston Wash. With out  
the barge service these mill will not operate.  
In return I will not operate because of tracking  
cost. people lose jobs I lose \$900,000.00 in equipment  
and the forest once again becomes unmanaged to bugs and  
fire. The silt runs in our streams and the fish  
die. Removing the DAMS is not the answer
