Dear Sir,

I am concerned about the earth we are leaving to our two children and the generations to come. Therefore I am writing to you to urge removal of the four federal dams on the Snake and Columbia Rivers so that those ecosystems and the salmon and steelhead they support may begin to thrive. The dams provide minimal power but do so at the expense of the survival of salmon and steelhead.

Although I am one lone voice, I hope that my concern will weigh-in as you make the crucial decisions regarding these two great rivers. Despite not being a resident of the Northwest, I have spent considerable vacation time there and love the area.

Thank you for your thoughtful consideration.

Sincerely,

Susan J Baker
