Re: Lower Snake River Juvenile Salmon Migration Feasibility Report

Dear Army Corps of Engineers:

I am a citizen of the Pacific Northwest and believe the best way to aid our salmon is to adopt Alternatives 1, 2, or 3.

I also believe in reducing the tern population, control fishing that has adverse effects, completely involve the Indians in conservation of the salmon and all other reasonable methods that allows the progress we have made in having dams, river management etc and finds ways to make progress from that point on. Regressing by removing the dams is not a reasonable option.

I oppose dam breaching and further study of the John Day reservoir draw down study because it is economically harmful and will not help recover salmon.

Thank you for the opportunity to comment.
