Fish and Wildlife Implementation Plan Environmental Impact Statement

1. In addition to the major policy directions you are contemplating to encompass the regional efforts for fish and wildlife recovery, please include the following major policy direction: Limit actions within stream corridors that cause degradation, limit riparian surfaces, maximize natural stream & wet courses

2. To create clearer, more distinct differences among the fish and wildlife policy directions we have proposed, more descriptive titles would be: _____

3. The key issues I am most concerned about for the regional fish and wildlife recovery effort are Habitat, Habitat, Habitat.

4. I need more information or clarification on The responsibility (financially legal) that BPA has for the destruction of wildlife species.

5. I have these other comments: ~~_____~~
Post development themes, bigger is better, benefits to excessive populations, and plenty a heavy hand on every corner of the earth must change.
