3/20/00

Dear To Whom It May Concern,

We strongly believe that you should **NOT** breach the Dams.

Here are the reasons why we think this:

- Many people will lose their jobs.
- People will have to drive instead hauling things by boat. This will be more expensive and create more pollution from the gas.
- It took a lot of money to do this in the first place, so why take it out now and waste lots of money.
- This water level will be different.
- This will cause our town, Pomeroy, to barely exist because too many people will lose their jobs and move away.

These are our reasons that we would appreciate you not breaching the Dams. Thank you for your time and please consider this.

Sincerely,

*Kadi Bemis, Kayleigh Greene and Samantha Schulte*
