Walla Walla, WA 99362

Dear Sirs:

PLEASE ! PLEASE ! DESTROY NO DAMS !

If building the dams was wrong, destroying them won't make things right.
It will only make a gigantic mess:

- Muddy empty reservoirs to restore to beauty
- Concrete and metal debris to pile somewhere
- Increased truck traffic on highways which are already too busy
- Loss of habitat for **many** species other than salmon
- A need to replace hydro electric power with fossil fuel power (yuk)

If Ford's engineers could invent the V-8 engine, there ought to be plenty of engineers who can improve fish ladders etc.

Yours

Warren's Lyell Kiddle
