

Dear Vice-President Gore,

Soon, you must decide how to restore wild salmon in the Columbia and Snake Rivers. I urge you to adopt measures which restore more natural conditions to these rivers.

I encourage you to choose partial removal of the four Lower Snake River dams as the centerpiece of your restoration plan. This alternative is scientifically and economically practical, and is the only option that will fully comply with federal laws and treaties. Unless you take this bold step, Snake River salmon will go extinct. The Snake River dams don't make sense. Your decision will be a test of your commitment to a healthy environment and a sustainable economy.

Please make this part of the official public comment record for the Administration's decision. Thank you.
