

*March 23, 2000*

*To Whom It May Concern:*

*We as water users in South Eastern Idaho strongly oppose breaching of the four lower Snake River dams. Because of and not limited to the following reasons:*

- *Removal of dams will not prevent demand of additional water out of Idaho.*
- *Flow augmentation has not worked and will not work in the future.*
- *So many factors influence the salmon recovery, such as climate conditions, predators, fishing practices, etc. Unless these factors are all addressed, it will not be affective.*

*Thank You for your consideration.*
