We the undersigned *SUPPORT SAVING DAMS* and *OPPOSE DAM REMOVAL* or *DAM BREACHING* for salmon restoration: (Please see back of petition for reasons)

There is a movement in the Pacific Northwest to remove dams on the Snake and Columbia Rivers for salmon restoration. This would destroy a major source of the regions hydropower generation, flood and erosion control, farm irrigation, recreation, tax generation and barge shipping. These entities provide the major economic base for these areas. Mainly because of politics, bad science and lack of common sense, there has been no consideration in this process to address the needs and welfare of people that live and work in these areas. We are not opposed to salmon restoration, but any plan should protect people as well as the salmon.
