Public Notice

FINAL NATIONWIDE PERMITS – Regional Conditions and
Water Quality Certifications Approved

Date of Notice: August 21, 2007

On March 12, 2007, in Part II of the *Federal Register* (72 FR 11092), the U.S. Army Corps of Engineers (Corps) announced the reissuance of all existing Nationwide Permits (NWP), general conditions, and definitions with some modifications. The Corps also issued six new NWPs, two new general conditions, and 13 new definitions. The NWPs were effective on March 19, 2007. An index of the NWPs is enclosed. These NWPs are activity-specific and authorize certain activities in non-tidal waters of the United States that have minimal adverse effects on the aquatic environment.

Corps of Engineers Northwestern Division approved regional conditions and Idaho Department of Environmental Quality and Environmental Protection Agency water quality certification conditions for the 2007 Nationwide Permits (NWPs). Regional conditions provide additional protection for the aquatic environment, by ensuring the NWPs authorize only those activities with minimal adverse effects on the aquatic environment. Regional conditions will help protect high value waters within the District. The NWPs, regional conditions, and water quality certifications for Idaho are available on the Internet at:
