Little Goose Pool

To Operate with Additional One Foot of Water

Recent problems for tow boats exiting the lock at Lower Granite Lock & Dam, Snake River mile 107.5, has prompted an order from the Reservoir Control Center to operate Little Goose pool with an additional foot of water. This request was presented to the Technical Management Team (TMT) and approved on July 19, 2006. The additional water will provide the clearance of 15' over the lock sill necessary for tow boats to safely exit the lock.

Little Goose Pool will begin rising on Monday, July 24, 2006, and gradually fill to the 634.0' to 635.0' operating range over the following 24 hours.

For additional information, please call (509) 527-7115 or (509) 527-7114 or email: cenww-od@usace.army.mil
