Little Goose Navigation Lock

Update #3

Floating Bulkhead Lockage Ability Delayed

Little Goose Navigation lock located at Snake River mile 70.3 will continue to remain closed for several days beyond March 30. Lowering the upstream gate safely into a secure position for bulkhead lockage is taking more time than originally planned. Numerous activities related to lowering the gate have proven to be much more challenging than originally envisioned and has hampered repair efforts.

The new scheduled date and time of the reopening of the lock, using the floating bulkhead, will be determined and announced as soon as possible.

Your cooperation in this matter is much appreciated. For additional information, please call Operations Division, at (509) 527-7115 or (509) 527-7114.

Public Notices and other navigation lock information are available on the Internet at:
