## **Little Goose Navigation Lock Update # 11**

### **Little Goose Navigation Lock Interim Lock Availability for Commercial Lockage**

Little Goose navigation lock has returned to limited service using floating bulkhead lockage for commercial vessels during night hours. Knight Construction will continue working 12-hour day shifts, beginning April 5 at 7:00 a.m., to permanently repair the damaged lock gate.

All recreational craft lockages are cancelled until the lock returns to full service.

Wind and other weather conditions will play a part in the lockage turn-around time. An average of 2-3 hours is expected to complete the upstream/downstream cycle. Every effort will be made to accommodate everyone in a timely manner.

#### **Commercial Vessels Only**

**Thursday, April 5 and each night following until gate returns to full service**

First lockage at 7:00 p.m. downstream  
Last downstream lockage 4:00 a.m.

The floating bulkhead must be in place for Knight Construction to begin their work at 7:00 a.m.

Updates will be provided as repair work progresses.

Your cooperation in this matter is much appreciated. For additional information, please call Operations Division at (509) 527-7115 or (509) 527-7114.

Public Notices and other navigation lock information are available on the Internet at:
