## **Little Goose Navigation Lock Update # 13**

**Little Goose Lock expected to reopen for full service lockage  
Saturday, April 28, 2007, at 8:00 p.m.**

Repair work is nearly completed on the upstream gate at Little Goose Lock and Dam, located at Snake River mile 70.3. Thanks to the hard work of Knight Construction and the many others involved in the gate repair, the lock will reopen to full service two days earlier than was anticipated in the original schedule.

A few tasks remain to be completed at this time. If all goes according to plan the lock will reopen for full service with the removal of the floating bulkhead at 8:00 p.m., Saturday, April 28, 2007. Recreational craft lockage will resume at this time.

Your cooperation in this matter has been much appreciated. For additional information, please call Operation Division at (509) 527-7115 or (509) 527-7114.

Public Notices and other navigation lock information are available on the Internet at:
