Delay in Lockage at Lower Granite Lock Located at Snake River Mile 107.5

Damaged cables on the upstream navigation lock gate at Lower Granite Lock and Dam have temporarily impacted lock operations.

Lower Granite personnel are replacing the cables and we anticipate repair will take approximately four days.

In the interim, Lower Granite will be using the floating bulkhead to pass commercial vessels through the locks. This will add additional time to each lockage.

To minimize impact, commercial lockages are being coordinated at Lower Granite Control Room; call 509-843-1493 ext. 231, or contact the Lock Operator on Marine Radio Channel 14 for locking instructions.

Recreational craft lockage is canceled until the repairs are completed.

We appreciate your understanding and cooperation. For additional information, please call Operations Division at (509) 527-7115 or (509) 527-7114.

Public Notices and other Walla Walla District navigation lock information are available on the Internet at:
