## Ice Harbor Navigation Lock Gate Repair Is Completed

Ice Harbor upstream navigation lock returned to service at 5:00 pm, 1 December 2003. The repair work was completed 48 hours earlier than originally expected.

Lockages have returned to regular service for commercial and recreational craft. Commercial lockages are on demand and the winter recreational craft lockage schedule is now in effect, with upstream lockages at 8:00 a.m., 11:00 a.m., and 3:00 p.m. and downstream lockages at 8:30 a.m., 11:30 a.m., and 3:30 p.m.

Walla Walla District has updated it's website for navigation. Currently, the "Hot Topic" is Ice Harbor Lock. There are pictures of the damaged gate, as well as the gate after repair. This website will be updated with navigation information and public notices as events occur. The Internet link follows:
