# DOING BUSINESS WITH US

The Northwestern Division is comprised of five Districts: Kansas City, Omaha, Portland, Seattle and Walla Walla.

Our Contracting Opportunities Forecast affords you opportunities to help the Northwestern Division and the US Army Corps of Engineers (1) execute our mission, and (2) achieve established small business goals.

The Northwestern Division's objective is to assist you in maximizing to the extent practicable your opportunities to participate in the federal market place, advancing the goals of national security, a sustainable industrial base and progression of our small business performance today and into the future.

Once a requirement is identified, we conduct market research to identify small business interest and capability to accomplish the requirement as either prime contractors or subcontractors. This market research is assisted through outreach events such as the Innovation Summit, Small Business Conferences and Industry Days.

Additionally, small business responses to Northwestern Division's "sources sought notices" posted to the System for Award Management website, SAM.gov and use of the Small Business Administration's Dynamic Small Business search tool (<http://dsbs.sba.gov/dsbs>) are key elements of this market research.

For your convenience, the Northwestern Division's forecast business opportunities for FY23 and beyond are available for each District.

We invite Small Business, Small Disadvantaged Business (SDB), Service Disabled Veteran Owned Small Business (SDVOSB), Women Owned Small Business (WOSB), Historically Underutilized Small Business (HUBZone) concerns to work with us. If you have questions about an opportunity or opportunities within a District, do not hesitate to call or e-mail the District's Small Business Professional. Points of contact are listed on the back cover.

## **NWD Small Business Vision**

Champions of Small Business solutions to USACE engineering acquisition challenges.

## **NWD Small Business Mission Statement**

Execution of Small Business Prime Contractor and Subcontractor opportunities in USACE contract requirements thereby ensuring a broad base of capable service and supply contractors to support the Corps of Engineers' mission and strengthen the nation's economic development.

# DISTRICTS OF THE NORTHWESTERN DIVISION

## **Kansas City District-NWK**

Missions include Civil Works, Military Construction, Regulatory, and the cleanup of Hazardous, Toxic and Radiation waste. Civil Works boundaries include parts of Missouri, Kansas, Iowa, Nebraska, and Colorado; and manages 500 miles of the Missouri River, 18 lakes, and 2 hydropower facilities. Military Construction serves 7 military installations with construction services in Missouri and Kansas, as well as the U.S. Army Reserve Design Program in 10 states stretching northward from Missouri. It's the primary design district in 7 states and the secondary design district in 8 states for the Hazardous, Toxic, and Radiological Waste cleanup program, and it is responsible for Naturally Occurring Radioactive Materials Disposal (nonfissionable materials) for the entire U.S. The District provides emergency response and recovery to Kansas and Missouri under Public Law and the Nation under the National Response Framework.

## **Omaha District-NWO**

Provides investigation, engineering and construction services in the areas of water resources, design, construction, and environmental restoration. Federal civil works activities. Engineering design and construction for the Army and Air Force in 8 Mountain and Upper Midwest states. Hazardous, toxic, and radioactive waste cleanup. Additional special capabilities housed and supported by Omaha District are Protective Design MCX, Transportation MCX, USACE Rapid Response, Interior Design CX, MMRP Design Center, Centers of Standardization, Religious Facilities Center, Access Control Points, Regulatory Program (6 States), & Real Estate Service (10 States).

## **Portland District-NWP**

Provides engineering services to the Pacific Northwest and Nation to strengthen our security, promote a strong economy & enhance environmental sustainability. The District encompasses nearly 97,000 square miles of land and water in Oregon and southwestern Washington. The District's future is tied to helping to balance the region's competing needs for navigation, flood damage reduction, hydropower, fish and wildlife habitat, disaster recovery, irrigation and recreation. This is accomplished by improving and maintaining navigation for economic development and safety, preventing & reducing flood damage, restoring, enhancing & maintaining ecosystems, generating reliable and efficient hydropower, regulating activities in wetlands and waterways, providing Corps-wide expertise in hydroelectric planning and engineering, and by providing safe and healthful recreational opportunities for the public.

## **Seattle District-NWS**

Provides Military and Civil Works services as well as support for other agencies. The District also plays a key role in environmental protection and improvement — from protecting wetlands to ecological restoration and cleaning up hazardous and toxic waste pollution. The District's military mission includes designing and building projects for the Army, Air Force and Army Reserves. The District also provides technical services to other armed forces upon request. The Seattle District operates the Chief Joseph Dam in Bridgeport, Washington; the Albeni Falls Dam in Oldtown, Idaho; the Libby Dam in Libby, Montana; and the Hiram Chittenden (Ballard) Locks in Seattle, Washington.

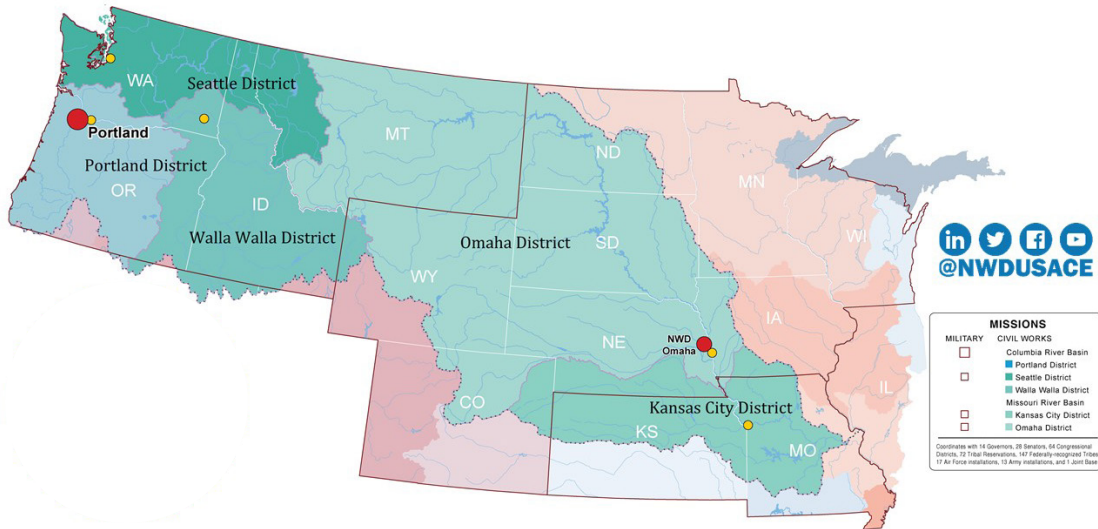

## **Walla Walla District-NWW**

Operates and maintains multi-purpose infrastructure assets, and plans and executes engineering and water resource services across the Inland Northwest and the Nation to safely maximize public and environmental benefits. A Civil Works District with boundaries generally following the Snake River drainage including approximately 107,000 square miles in 6 states. The District's 296 miles of rivers include, 6 hydropower projects; 5 multipurpose projects with hydropower and navigation, flood risk management, disaster assistance, wildlife habitat management areas, engineering and construction, dam and levee safety, environmental stewardship, fish programs, regulatory services for the state of Idaho and Walla Walla District recreation sites with about 8 million visitors a year.

## Omaha District-NWO

<https://www.nwo.usace.army.mil/Business-With-Us/>

Delivering quality engineering solutions in a timely and cost-effective manner, through collaboration with partners, to secure our nation, energize our economy, reduce disaster risk, protect our environment, and manage our water resources.

With more than 80 years of distinguished service marked by engineering excellence, outstanding technical support, and superb multi-disciplinary services, the Omaha District delivers quality, timely products and services at a reasonable cost.

The District has an exceptional reputation for overall engineering excellence, outstanding technical support, and superb execution across a wide array of multidisciplinary services which include:

- Federal civil works activities including administering the Clean Water Act Section 404 regulatory program in the upper Missouri River basin.
- Engineering design and construction for the Army and Air Force in eight Mountain and Upper Midwest states.
- Hazardous, toxic, and radioactive waste cleanup: restoring the environment for the U.S. Environmental Protection Agency and the Department of Defense at sites throughout the United States.
- Reimbursable program support to a diverse group of Federal partners addressing civil, military, and environmental support arenas (IIS).
- Deliver Real Estate products and services supporting all assigned missions and other Federal agencies.

# US ARMY CORPS OF ENGINEERS PORTLAND DISTRICT

[www.nwd.usace.army.mil/Business-With-Us/](http://www.nwd.usace.army.mil/Business-With-Us/)

## Portland District-NWP

<https://www.nwp.usace.army.mil/Business-With-Us/>

Provides engineering services to the Pacific Northwest and Nation to strengthen our security, promote a strong economy & enhance environmental sustainability. The District encompasses nearly 97,000 square miles of land and water in Oregon and southwestern Washington. The District's future is tied to helping to balance the region's competing needs for navigation, flood damage reduction, hydropower, fish and wildlife habitat, disaster recovery, irrigation and recreation. This is accomplished by improving and maintaining navigation for economic development and safety, preventing & reducing flood damage, restoring, enhancing & maintaining ecosystems, generating reliable and efficient hydropower, regulating activities in wetlands and waterways, providing Corps-wide expertise in hydroelectric planning and engineering, and by providing safe and healthful recreational opportunities for the public.

**Ms. Carol A. McIntyre**

# US ARMY CORPS OF ENGINEERS SEATTLE DISTRICT

[www.nwd.usace.army.mil/Business-With-Us/](http://www.nwd.usace.army.mil/Business-With-Us/)

## Seattle District-NWS

<https://www.nws.usace.army.mil/Business-With-Us/>

Provides Military and Civil Works services as well as support for other agencies. The District also plays a key role in environmental protection and improvement – from protecting wetlands to ecological restoration and cleaning up hazardous and toxic waste pollution. The District’s military mission includes designing and building projects for the Army, Air Force and Army Reserves. The District also provides technical services to other armed forces upon request. The Seattle District operates the Chief Joseph Dam in Bridgeport, Washington; the Albeni Falls Dam in Oldtown, Idaho; the Libby Dam in Libby, Montana; and the Hiram Chittenden (Ballard) Locks in Seattle, Washington.

## Walla Walla District-NWW

<https://www.nww.usace.army.mil/Business-With-Us/>

Operates and maintains multi-purpose infrastructure assets, and plans and executes engineering and water resource services across the Inland Northwest and the Nation to safely maximize public and environmental benefits. A Civil Works District with boundaries generally following the Snake River drainage including approximately 107,000 square miles in 6 states. The District's 296 miles of rivers include, 6 hydropower projects; 5 multipurpose projects with hydropower and navigation, flood risk management, disaster assistance, wildlife habitat management areas, engineering and construction, dam and levee safety, environmental stewardship, fish programs, regulatory services for the state of Idaho and Walla Walla District recreation sites with about 8 million visitors a year.
