GREEN SHEET

Project Name and P2 or REMIS Number: Gooding Diversion Flood Reduction

Project, Little Wood River, Gooding County, Idaho

Environmental Compliance File Number: PM-EC-2018-0031

Responsible Environmental Staff: Jarrett Schuster, Environmental Resource

Specialist, 509-527-7256, <u>Jarrett.L.Schuster@usace.army.mil</u>

Environmental Conditions or Mitigation Requirements: The table below lists all avoidance thresholds, mitigative requirements, stipulations, requisite best management practices, environmental commitments, permitting conditions, or monitoring identified as necessary to ensure the proposed action is implemented in compliance with the pertinent laws, regulations and Executive Orders reviewed. A record of completion of these items must be maintained in the Walla Walla District environmental compliance records.

Environmental Condition or Mitigation Requirement		Status & Date
1.	The contractor must develop an Environmental Protection Plan describing how equipment will be stored in a way that prevents pollution of the environment by preventing or containing leaks or spills from equipment.	
2.	Equipment used for this project shall be free of external petroleum-based products while used around the waters of the state (Little Wood River). Accumulation of soils or debris shall be removed from the drive mechanisms (wheels, tires, tracks, etc.) and the undercarriage of equipment prior to its use around waters of the state.	
3.	Wash water containing oils, grease, or other hazardous materials resulting from wash down of equipment or working areas shall not be discharged into state waters. The Applicant shall set up a designated area for washing down equipment.	
4.	All dewatering water would be discharged upland. No water shall be discharged into the Safety Way Channel or the Little Wood River. The water won't be in contact with wet concrete or any type of debris resulting from construction so there is no possibility of contamination.	

NPWOM 200-1-1: When conditions for development or mitigation activities are prescribed through preparation of environmental documents, the District proponent shall be responsible for ensuring that such conditions or activities are taken into account, that such features are incorporated in schedules and budgets, and are designed, constructed, and installed as described. Environmental Resources Branch (now Environmental Compliance and Cultural Resources Sections) shall be responsible for monitoring to ensure that such conditions are incorporated and mitigation is accomplished and maintained as described in the environmental document.
